1. In view of the appeal brief filed on 07-22-03, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
- (2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 4-6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 4 recites "peripheral part extends in a plane (III) between a bottom plane (I) through bottoms of longitudinal channels (20) and a top plane (II) through a top of longitudinal channels (20). What is a plane III? There is no Drawing or description showing orientation of

Art Unit: 2673

Claim also 6 also recites "being stopped before grinding wheel reaches an opposite edge of plate. Where is that opposite edge of plate shown? Is it before or after item 56 in Figure 6.

Figure 5 is confusing: In order to understand the claimed invention, the Examiner is requesting the Applicant to provide a more explanatory figure 5 as to how the planes I, II and III are correlated to each other.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 recites the limitation "said first portion (52)". There is insufficient antecedent basis for this limitation in the claim.

Drawings

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the interrelations between I, II and III planes must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

the plane III. It is not clear the interrelation between planes I, II and III. Please provide a figure to explain the relationship between these planes I, II and III.

Claim 4 also recites “Channel comprises a sloping ramp (55) sloping from bottom plane (I) to plane (III) and ending in peripheral part (50, 51). Where is a **sloping** ramp 55? It is not shown in the drawings or in the description. There is no Drawing or description showing orientation of the **sloping** ramp and the plane III. Where is the interrelation shown between plane III and **sloping** ramp?

The specification and drawings do not show or describe the plane III or/and the **sloping** ramp in perspective or in a plane. Figure 5 is confusing and does not help in to understand the claimed subject matter, because it does not show the correlation between planes I, II, III and **sloping** ramp. Furthermore, Figure 5 does not show the “D” dimension. Figure 5 shows items 58, 59 which are not described in the Specification.

Claim 5 recites : “ a central part (52) having a first depth, flanked on one or both sides by a second portion (53) having reduced depth, a third portion (54) having a depth corresponding to first portion (52), bottoms of first, second and third portions extending in the bottom plane (I); and a fourth portion comprising **sloping** ramp (55)”.

- (1) How can (52) be central part, while in the figure shown (52) at the end?
- (2) It is not clear how the first, second and third portions are extended in plane (I)?
- (3) The fourth portion – sloping ramp (55) not shown in Figure 5.

Claim 6 recites “ a depth between a bottom and top of longitudinal channels”. Where is this depth shown in the drawings?
